

ASV – ARMoured SECURITY VEHICLES

Our set-up is your backup!

You can be sure of our utmost discretion and, using the latest technologies and special materials, it is possible to armour a personal protective vehicle so discreetly that the external appearance of the vehicle remains unchanged.

For some vehicles, we have goods in stock, which make fast adaptations possible. In principle, it is of course possible to equip any vehicle with safe, discreet and reliable armouring, if required.

- Armoured SUVs
- CIT Vehicles

AMV – ARMoured MILITARY VEHICLES

Our mission for your missions!

In operational areas, there is often no exact information on the type and manner of threats. Military vehicles armoured by Ressenig correspond to the relevant STANAG standards of NATO and can be adapted to the operational profile in their protection class thanks to light, medium or heavy design.

- Adaptive Protection Kits (APKs)
- Discrete Armoured Solutions
- Military Truck Bodies

ALL WAYS PROTECTED

ALL WAYS PERFECTION

Quality as a family member

Ressenig has been active in the field of vehicle construction for more than one hundred years. Now managed in the third generation, the traditional company has developed into a modern global player, which has become a premium-quality business for vehicle armoring thanks not least to its advanced development work.

In addition to special, custom-made products manufactured according to the customer's needs, Ressenig offers solutions in the following areas:

Armouring:

- **Adaptive Protection Kits (APKs)**
- **Discreet Armoured Solutions**
- **Development and Production of Armoured Vehicles**
- **Ballistic Protection Shields**
- **Military and Civil Truck Bodies**
- **CIT (Cash-in-Transit) Vehicles**

ALL WAYS CUSTOMISED

Safety first, survival at least

Our experience makes us experts in our field. But expertise is not the only thing that makes us a partner for international customers. In our facility in Villach, our work is customer-orientated and flexible, from construction research to development, from professional production to sales. We make custom-made products, but also develop prototypes to be used for manufacture. Reliability and observance of deadlines make us not only an OEM, but also a centre of excellence for protection systems.
